## alix interface names

Posted by Don.K - 2007/11/20 09:04

---

<http://www.a-enterprise.ch/images/note.png> As announced, with the availability of the new alix2c boards also a renewal on the interface names, This call now vrX instead of sysX (sys0 to vr0)

! What to do after the image is created, attach a serial cable and set with option one the interface names (serial default 38400,8,n,1)

=====
