

# Install Guide Asterisk Desktop Manager for DialFox Phonebook

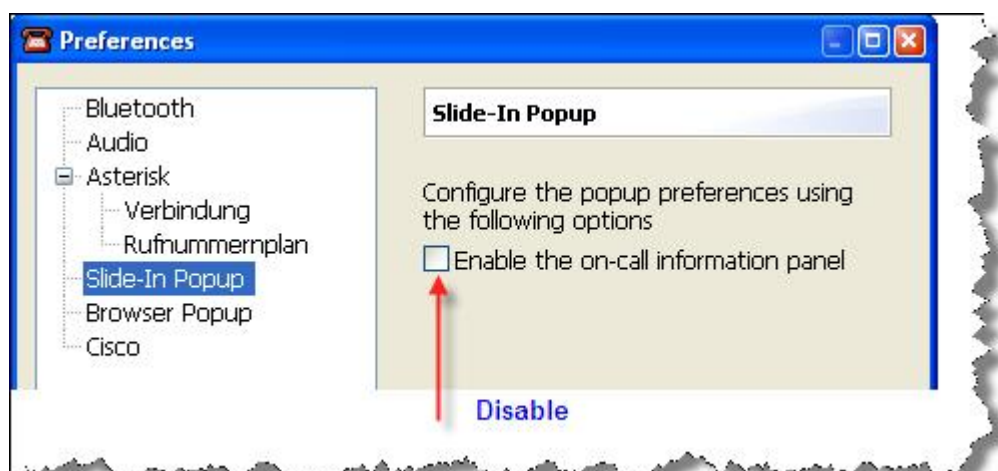

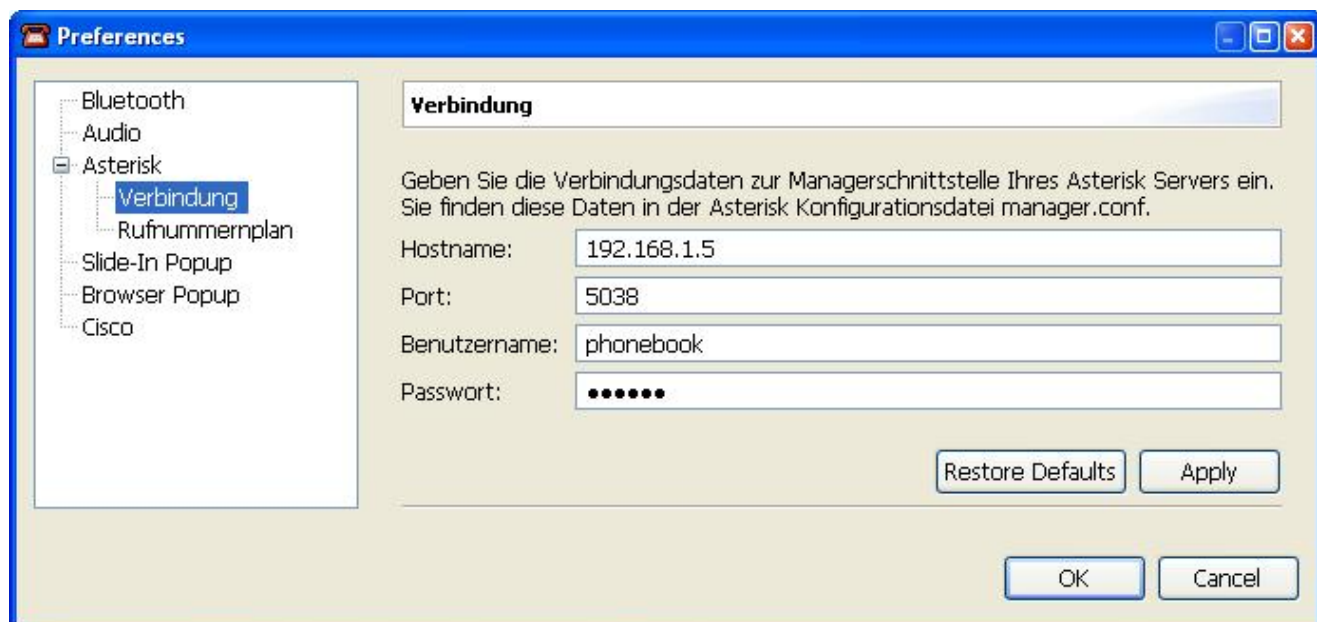

Download ADM <http://adm.hamnett.org/node/2>

Here this is an example for Asterisk PBX 192.168.1.5, local extension 404

Asterisk AMI modify in `/etc/asterisk/manager.conf`

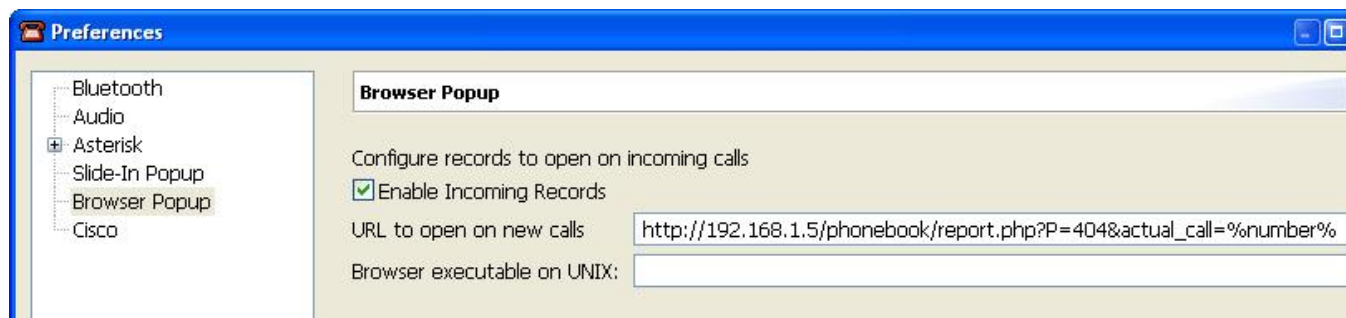

```
[phonebook]
secret = 1234
deny=0.0.0.0/0.0.0.0
permit=192.168.1.0/255.255.255.0
read = system,call,log,verbose,command,agent,user
write = system,call,log,verbose,command,agent,user
```

## Modify Preferences

# Install Guide Asterisk Desktop Manager for DialFox Phonebook

## Browser Popup URL

URL to open on new calls: `http://192.168.1.5/phonebook/report.php?P=404&actual_call=%number%`

## Incoming calls will be displaying

The screenshot shows the 'LOG Report' window in Asterisk Desktop Manager. The window displays a table of call logs. The top bar shows 'LOG Report', a dropdown menu set to '25', a 'limit' button, and the 'SERVER DATE' as '22.11.2008 11:26'. Below the header, there are five icons representing different call types: a calendar, an IP phone, a landline phone, a mobile phone, and a globe. The table below shows three rows of call logs. The first row is highlighted in yellow and shows an incoming call from '088 999 04 55' to 'Matthias' on '22.11.08' at '11:26'. The second and third rows show outgoing calls to 'noname' from '0031735483667' on '21.11.08' at '15:41'.

Date	Time	Duration	Number	Name
22.11.08	11:26		088 999 04 55	Matthias
21.11.08	15:41	404	0031735483667	noname
21.11.08	15:41	404	0031735483667	noname
